

MCC Travelling Safely Tracker

Ref	Topic	Action	Owner	Status
1	Steels Place – Temp Fix	See if raised table can be patched pending full fix	Cllr Munro	Closed
2	Steels Place – perm fix	<p>See if included in the ‘morningside road pavement’ work as previously understood.</p> <p>AW chased Brendan Forrester/Team a few times, now escalated to Cllr Ross. Update; Brendan Forrester has just confirmed to Cllr Ross that funding secured to address the crossing, more details to follow. On that basis item 1 no longer needed.</p> <p>(23/3) Question posted to see if can be made a ‘continuous footway’</p> <p>(2/4) Confirmation from officers that budget found, and plans are to deliver as a ‘continuous footway’.</p>	Cllr Ross	Open
3	Braid Avenue Trees	<p>Old tree stumps have been removed in last couple of days.</p> <p>Arrange site visit & engage residents for 20 tree replacements – following stump removal Cllr Munro is chasing forestry again re meeting</p> <p>(23/3) visit arranged, good progress with tree pits</p>	Cllr Munro	Closed
4	Potholes	<p>Continue to encourage folk to report them.</p> <p>Have posted on MCC f/book. On Fri 20th Feb I counted approx 60 reported potholes in area, this is down to 42 today (13/3/26) -- however how many fixed unclear & whole city clearly swamped atm.</p> <p>Is there a wider action plan with council to address ?</p>	All councillors	Open

		<p>(23/3) Discussed @ MCC. Additional funding & staff recruitment underway, but still a big problem & we need to continue to report p/holes</p> <p>(18/5) Interestingly Roadworksscotand.org shows Falcon Road, Falcon Road West, Comiston Gardens, and Comiston Place being closed for re-surfacing work later in summer (see screen grabs at foot)</p>		
5	Greenbank Lane	<p>See if residents secure funding for Local Traffic Improvement Programme. Next update post TEC in April.</p> <p>(2/4) Confirmation in TEC report that work is included in program of 'Local Traffic Improvements':</p> <p>Buildouts and raised crossings at junctions in wider Greenbank estate to promote pedestrian travel and reduce vehicle speeds at key entry and exit points. Budget £100,000 to £150,000</p>	Cllr Ross	Open
6	Comiston Drive – 3 point turns	<p>Raised before xmas after crash. We think its being picked up by SMPS; is it with any councillors ?</p>	All councillors	Open
7	Morningside Road pavement widening	<p>In plan for later this year.</p> <p>2/4 Councils report shows planned June 26 start: https://www.edinburgh.gov.uk/downloads/file/38805/active-travel-improvements-programme-january-2026</p> <p>18/5 Not showing on Roadworksscotland just yet</p>		Open
8	Canaan Lane improvements	<p>See if current plans can be made a bit more ambitious</p>	John Robson	Open
9	Braid Estate Quiet Route	<p>Looks like this is 'on hold' until TEC meets in April to decide way forward - is that correct ?</p> <p>(23/3) Cllr Watt to ask (1) how can decision be made whilst keeping current route in place ? And (2) how far back in process will this need to</p>	Cllr Watt	Open

		<p>go ? And to offer a meeting / discussion if that'd help</p> <p>(2/4) TEC have decided to pass the current layout to TRO sub-committee, where it can be decided to retain in whole or in part or to remove.</p> <p>(18/5) TRO sub-committee results widely reported. In summary makes Comiston Road & Braid Road permanent; but modal filters on Canaan Lane, Braid Avenue and Hermitage Gardens to be removed. Questions outstanding (1) timing of change (2) what happens to 'white lines'. Officers report going to TEC in June.</p>		
10	Morningside Park crossing	<p>This has been raised again & will discuss @ next meeting.</p> <p>Alastair building a case for action.</p> <p>Have tried getting Alan Dunlop to explain any options for intervention, and failed, so have escalated to Cllr Watt for help</p> <p>18/5 Cllr Ross has requested "Deborah Paton specifically with regard to these three items and asked for an officer to attend a future meeting of MCC to discuss them". So that's this item, plus 11, plus 12.</p>	<p>Alastair Webb</p> <p>Cllr Ross</p>	Open
11	Cluny Drive / Midmar Drive junction	<p>(23/3) raised at MCC (as it has been before) because blind corners make crossing feel dangerous.</p> <p>Some evidence gathering being done before next CC meeting</p> <p>(11/4) Serena is working on building a case for action</p>		
12	Morningside Drive pavement North Side	<p>2/4 As discussed in March meeting, much of this is impassible at eastern end of road</p>		
13	Bellhaven Terrace crossing	<p>2/4 This has previously been discussed, and with Bin Hubs reducing 'line of sight'</p>
